This is to protest strongly the unseemly haste of a hearing to decide on Immediate Installation of the 69 k V line by SSVEC. This hearing is too sudden for us to attend in person. SSVEC means to flood the first hearing with their employees who will, of course, speak in favor. We attended the so-called forum at Elgin School on March 11 and it was an hour and a half lecture on all the wonders of this line. We did not speak as you had to sign up ahead to do so, and it was only as others brought up issues that we developed questions. The sitting panel got quite edgy when asked detailed questions from those who had signed on to speak. We need true forums to address certain issues. The truth seems to be we do not need this much power at this time, nor for a long, long time. Why which time we are convinced there will be alternatives to augment the standard transmission line. Please to not accede to SSVEC demands!

P. S. We are not within sight of this line, probably at least 5 miles north
